

**protocol**

The diagram illustrates a protocol structure. At the top is a green horizontal bar labeled 'protocol'. Below it, a green vertical bar labeled 'graduation' connects to two blue horizontal bars labeled 'task\_0' and 'task\_1'. Each task bar has a series of vertical stripes on its right end: green for 'task\_0' and blue for 'task\_1'. Below each task bar is a sequence of three red rounded rectangles representing 'stages'. The first two stages in each sequence are solid red, while the third stage has vertical stripes matching the task's color (green for 'task\_0' and blue for 'task\_1'). Arrows show a linear flow from left to right between the stages, and a curved arrow at the bottom of each sequence points from the third stage back to the first, indicating a loop.
